(54) VEHICULAR STEERING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To reduce the steering incompatibility sense giving to a driver, even in the trouble time of a transmission ratio variable mechanism.

SOLUTION: At the trouble time of a transmission ratio variable mechanism 30, an assist force generated by the actuator 60 of a power steering device is changed in response to the deviation of the transmission ratio before/after a trouble. When the transmission ratio at the trouble time becomes quick in comparison with a normal time, a steering reaction is increased and a steering amount is restrained and when it becomes slow, the steering reaction is reduced and the steering amount is increased.

LEGAL STATUS

[Date of request for examination] 30.11.2001

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3409838

[Date of registration] 20.03.2003

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
